

Landing Page of the bus ticket booking system where when clicking on “Book Now” the user will be redirected to Signup/login page.

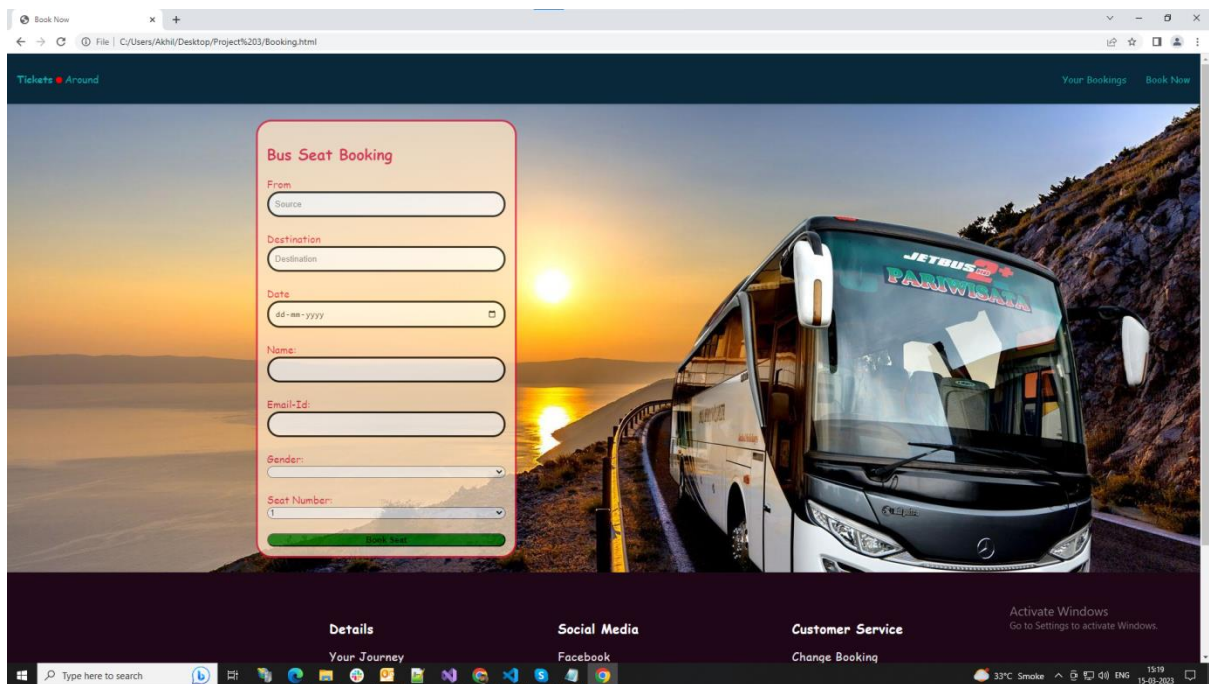

This is the signup/login page in which the signup container is currently visible due to its display style being block while the display style of sign in container is none.

This is the sign in container as its display is currently set at block. This is done with javascript

This is the booking page which opens only after a successful sign in. On this page a booking form takes in the required details and submits it for booking on which several conditions are checked like whether the seat which is being booked isn't already booked or in case a male or female user tries to book a seat next to a booked seat of an opposite gender.

The screenshot displays a web browser window with two main panels. The left panel shows a "Bus Seat Booking" form with fields for From (Kalyan), Destination (Dombivli), Date (15-03-2023), Name (Ba), Email-Id (ashu.pandey3@gmail.com), Gender (Male), and Seat Number (7). A red box highlights the form area. The right panel shows the Chrome DevTools console with the Application tab selected, displaying the page's metadata and storage. The Storage section lists several items, including a session storage item named "bookings" containing user information like email, password, name, and phone number. The bottom of the browser window shows navigation links: Details, Social Media, Customer Service, Your Journey, Facebook, Change Booking, and a search bar. The taskbar at the very bottom includes icons for various applications and system status indicators like time and weather.

Here the condition of male customer not being able to sit beside female customer.

The screenshot shows a web browser window with the address bar displaying 'C:/Users/Akhil/Desktop/Project%203/Booking.html'. The browser has four tabs: 'Morpheus', 'Sign Up / Sign In', 'Book Now', and 'Booking Output'. The page features a dark blue header with the text 'Tickets Around'. The main content is a 'Bus Seat Booking' form with the following fields: 'From' (Kalyan), 'Destination' (Belapur), 'Date' (15-03-2023), 'Name' (Rihanna), 'Email-Id' (aashu.pandey3@gmail.com), 'Gender' (Female), and 'Seat Number' (2). A green 'Book Seat' button is at the bottom of the form. A white error message box is overlaid on the form, stating: 'This page says Sorry, you cannot book this seat as it is adjacent to a male customer's seat.' with an 'OK' button.

Here the female customer not able to book tickets next to male customer.
